

WGF™, Wire Grid Film

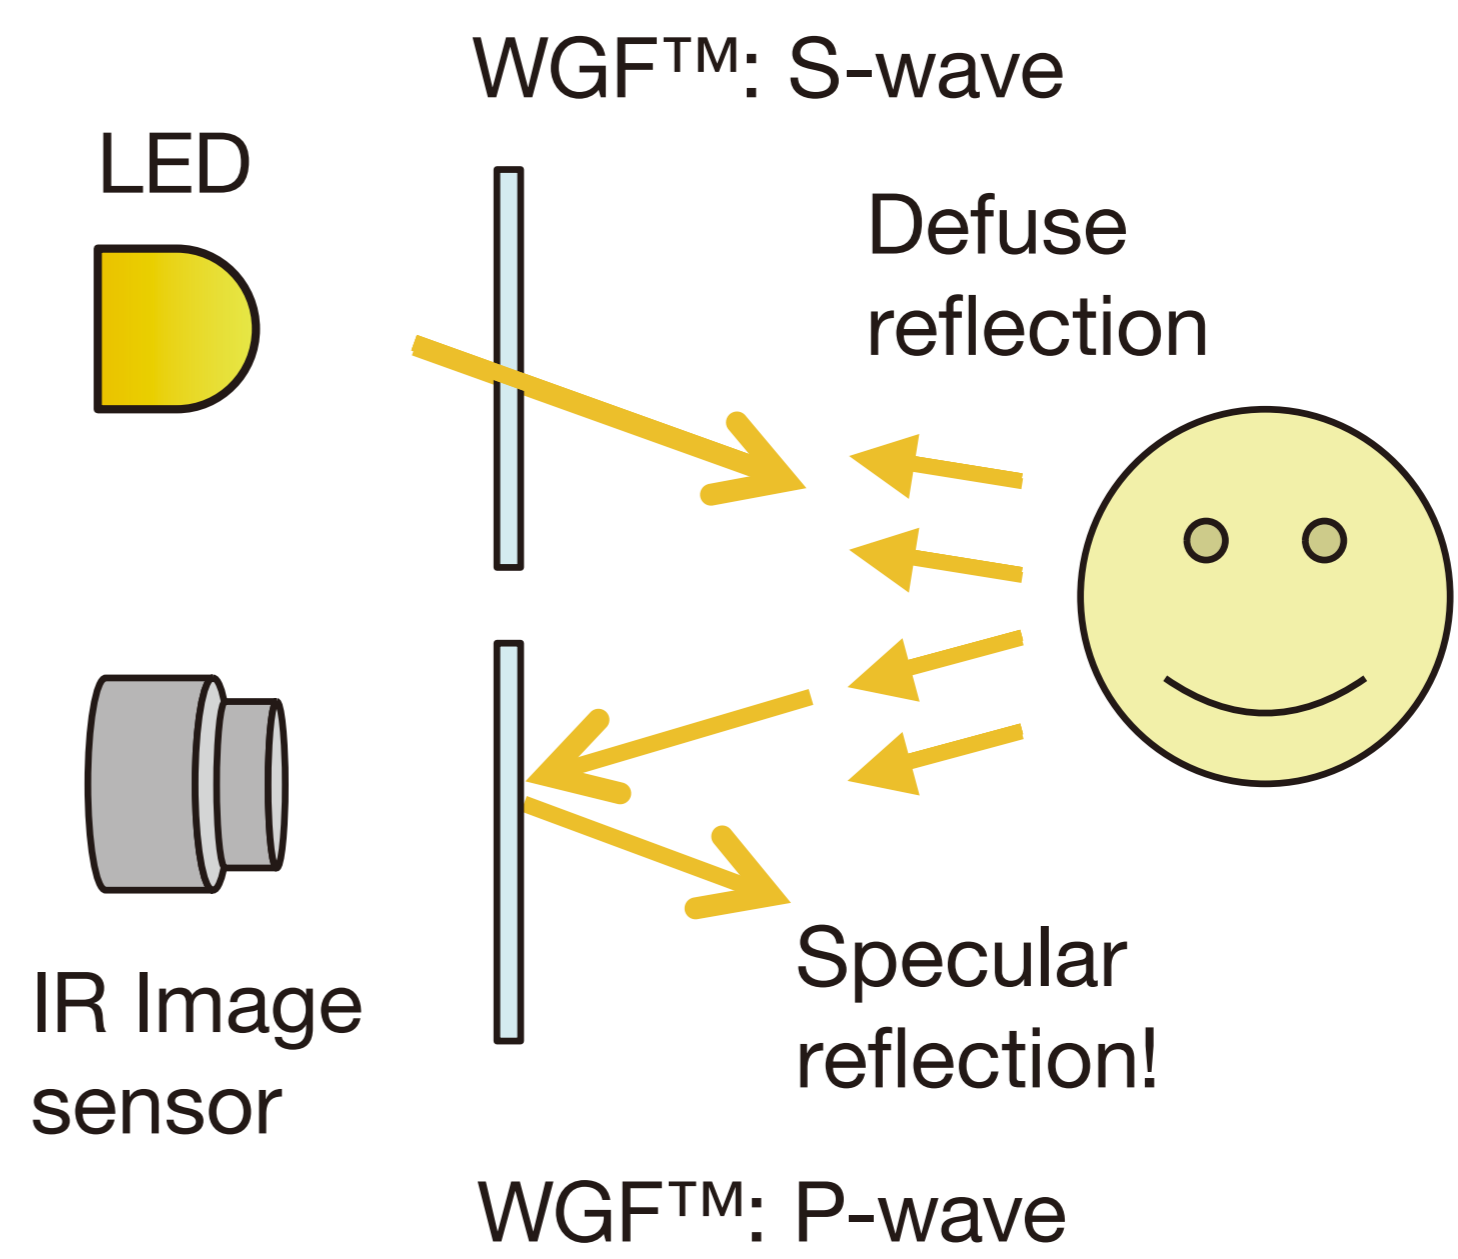

A Film base reflective polarizer

HUD, Head Up Display, IR image/linear sensor

Product Features

- Compared with conventional absorptive polarizers, WGF™ has higher heat & humidity durability such as 60degC x 90% or 105degC x dry.
- WGF™ is effective in a wide range from visible to IR. Reflection noise can be reduced using WGF as a filter in front of light source and detector in Crossed Nicol position.

State of Progress
